

TECHNOLOGIES

FOR DESIGN

oneplot®

Oneplot is a design company,
established for the purpose
of combining artistic flair,
technology and style.

Our corporate philosophy leads
to a choice of materials
and machining processes based on
a pursuit of the highest quality levels and on
the typical production excellence of the most
successful Italian design.

We transform your picture in a real,
made-to-measure object.

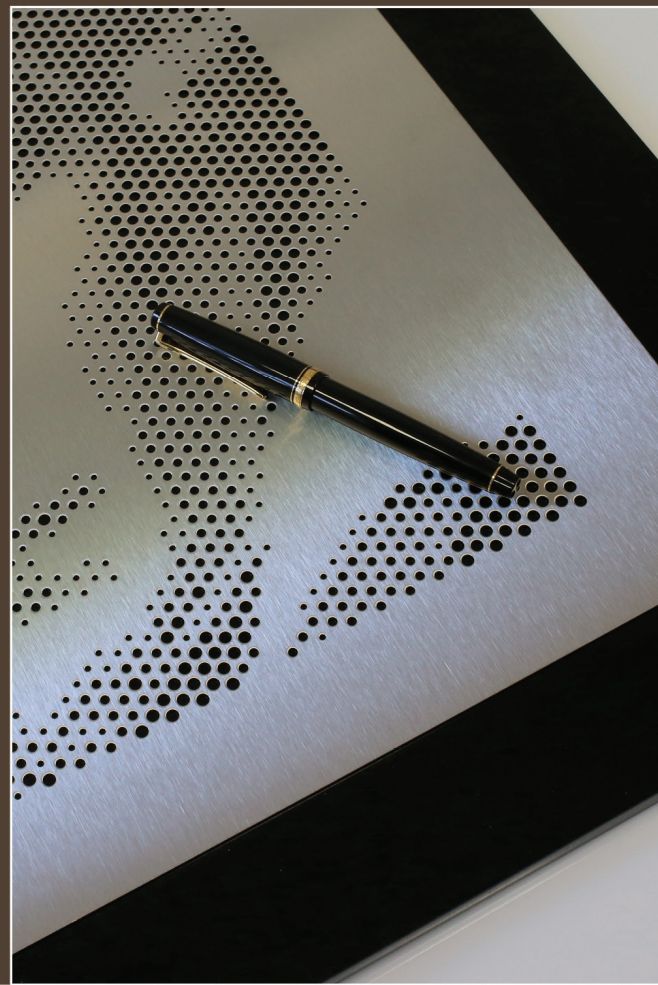

You can create your own product preview
for free on our website www.oneplot.com

Oneplot production range reproduces images
on several materials, combining them into
personalized and unique products.

The process begins with the choice of
any photographic image and ends
with the production of a product,
in which a grid of holes interprets
the light and shade effects
of the original picture.

MF = MICROHOLE TECHNOLOGY:
material: AISI 304 (EN1.4301)
stainless steel 0,15 mm thick

PZ = PUNCHING TECHNOLOGY:
material: AISI 304 (EN1.4301)
stainless steel 0,80 mm thick

Custom product

Oneplot production range reproduces images on several materials, combining them into personalized and unique products.

The process begins with any photographic image and ends with the production of a product, in which a grid of holes interprets the light and shade effects of the original picture.

Oneplot is prepared to supply totally personalized products, being in a position to provide, by appointment, an in-depth advice service aimed at finding the most appropriate solution for any customer requirement, both from the point of view of materials to be used, and from the point of view of end-product size.

Feel free to contact us. Send us your image file and we will send you a free preview and an estimate.
